We also have access directly or through our associate Companies to the Australian market for sourcing materials. Depending of currency levels we look to source from those areas or in those currencies, which are most beneficial to the client.

Status Exports Limited Statement:

We at Status Exports Limited, pride ourselves in the fact that over the years of trading within the Pacific Basin, that we still have on our books some of those valued customers we first contacted back in the 80's.

We have a commitment to service and supply quality products at fair and competitive prices. If we cannot source or obtain a product that we would be competitive with, in many cases we will recommend someone for you, the customer, for that product.

We offer service with regular calls from either ourselves or our valued suppliers to ensure that you will know who you are dealing with. Whilst we are not a large organization, we develop our trade through close contacts and understanding.

We have one of the lowest insurance claims records in the industry. Where any supply is potentially damageable or losable, we crate these in substantial plywood crates. Crating is always an option as well with mixed cargo items which are normally boxed but using too much volume.

From our clients, we welcome the opportunity to quote on their requirements and where our prices are competitive, the opportunity of supplying the order.

We are very proud of the service and commitment we offer our valued clients.
